Prospective software engineer for front-end and full-stack web development, mobile app development, systems administration, systems engineering, and/or game development.

Aspiring to learn more about front-end development, full-stack development.

Skills

HTML5 CSS3 Bootstrap5 JavaScript ReactJS NodeJS Git Figma
Object-Oriented Analysis and Design Database Management MySQL PHP NPM

Experience

Portfolio

<https://tariqmoore.github.io/Portfolio/>

- Personal portfolio website built using HTML5, CSS3, and jQuery.
- The website was deployed using GitHub Pages as a hosting service.

Simon Says: JavaScript Game

<https://tariqmoore.github.io/SimonGame/>

- Revamped classic Simon Says game with increasing difficulty that tests the user's memory.
- The website leverages jQuery to acquire DOM elements for manipulation such as introducing a game over animation and adding audio cues on success.

TinDog Project

<https://tariqmoore.github.io/tindog/>

- The website was created after receiving a design and programming it pixel-perfect with Bootstrap5.
- A completely responsive landing page that adapts to the user's viewport.

SmartBear Inc.

Feb 2023 - present
